What We Do

Air Conditioning & Ventilation (HVAC)

With 28 years' experience in the Air Conditioning Business we can honestly say we know what we are doing. The main purposes of a Heating, Ventilation, and Air-Conditioning (HVAC) systems are to help maintain good indoor air quality through adequate ventilation with filtration and provide thermal comfort. The choice and design of a HVAC system can also affect many other performance goals, including water consumption (water cooled air conditioning equipment) and acoustics.

At AAC we can design a quality system that is cost-competitive with traditional ventilation designs, while successfully providing an appropriate quantity and quality of outdoor air, lower energy costs, and easier maintenance.

Our Service includes:

- Air Conditioning Installation, this includes all types:
Ducted, Cassette, Wall Mounted and Downflow systems.
- Air Conditioning Service and Repair
- Air Handling Units
- Heat Recovery Ventilation
- Toilet and Kitchen Extract Systems

Commercial Refrigeration

With over 28 years of technical knowledge and experience Aherne Air Conditioning and Mechanical Services is well placed to offer its clients professional refrigeration consultancy. Our extensive experience has taught us what problems can arise for companies, especially the larger projects such as installations and refits.

By applying our experience and knowledge and asking the relevant questions, we can minimise problems resulting from poor communication or incomplete information. By using this strategy, AAC can save clients time, effort and money by ensuring that projects are completed on time, to specification and on budget.

We provide specialist expertise, flexibility and a personal service at a reasonable cost. Specialising in new equipment installations, refits, refrigeration equipment repair, servicing and maintenance and data alarm monitoring.

Our Service includes:

- Cold Rooms
- Freezer Rooms
- Serve Overs
- Cabinets
- Blast Chillers
- Ice Makers
- Beer Cooling Systems
- Supermarket Cases
- Glass Door Merchandisers

Maintenance & Servicing

Planned maintenance is vital to ensure trouble free running of any air conditioning or heating & plumbing system. Our service and maintenance packages can be tailored to suit you and your system whether we installed it or not. Our extensive experience, both in installation and maintenance, has enabled us to design service packages specifically designed for different kinds of business to ensure minimum disruption during your busy or critical times of the year.

Our Service includes:

- Service & Maintenance Packages tailored to suit all budgets.
- Pumps
- Boilers (Gas and Oil)
- Ventilation Fans
- Air Handling Units
- Water Tanks
- Complete Heating Systems
- Complete Plumbing Systems

Heating & Plumbing

Our services include all aspects of plumbing and heating for all commercial clients. These range from the design and installation of a complete central heating system or a fully refurbished bathroom, to a leaking radiator or a troublesome tap. Most of our business is generated from personal recommendations and returning clients.

With modern gas and oil appliances it is now more important that the appliances be maintained and serviced correctly and on a regular basis. Our experienced technicians carry out servicing, breakdowns and repairs on gas, oil and solid fuel appliances. In addition to the safety issues a boiler in need of servicing may be working at less than optimum efficiency this could lead to the heating system not performing as required and adding to your heating bill.

Our Service includes:

- The Design and Installation of Gas and Oil Fired Heating Systems
- We Service and Repair Gas and Oil Fired Boilers and Heaters
- Gas Fired Water Heaters Installed Serviced and Repaired
- Heating Control Upgrades
- RGI and Oftec Registered
- Design and Installation of Plumbing Systems
- Water leaks Repaired
- Copper, GB, Qualpex and UPVc

Electrical

At AAC we are capable of meeting all the clients' requirements for those seeking electrical maintenance and electrical service solutions. We cover all aspects of electrical works via our subcontractors whom are registered with Recr.

Our Service includes:

- Fuse Board Testing
- Re-Wiring
- Lights
- General Services

Facilities Management

At AAC we provide advice to major occupiers of commercial properties who are seeking to outsource facilities management strategy and delivery. We adopt a professional model to create a flexible workplace which meets the evolving needs of any business. This includes designing the facilities management services and standards tailored to the needs of the customer. Importantly, we agree client and customer interface, communication and liaison processes.

Our Service includes:

- Builders Works
- Painting and Decorating
- Roof Repairs
- Carpentry
- Plastering and Patching
- Electrical
- Air Conditioning & Ventilation
- Heating & Plumbing
